

Muhammad Ishar

ELECTRICAL ENGINEERING · PIEAS

m_ishar@icloud.com · 03239375361 · [GitHub](#) · [LinkedIn](#)

PROFILE

Second-year Electrical Engineering student at PIEAS and PEEF Scholar, pairing hands-on software and systems engineering (C++, Python, full-stack JavaScript) with leadership across IEEE and large-scale campus operations. Ships tested, production-deployed tools and leads teams under real deadlines.

EDUCATION

PIEAS

B.S. Electrical Engineering — 2nd year · 2025–2029

Punjab College, Wazirabad

ICS (Physics), Intermediate · 982 / 1200

Punjab College, Wazirabad

Matriculation · 932 / 1100

- PEEF (Punjab Educational Endowment Fund) Scholar — awarded on Intermediate 2025 result

LEADERSHIP & INVOLVEMENT

Co-Head — IEEE PIEAS SB, CS Chapter

Lead the chapter's technical programming and activities.

SKILLS

Languages C++, Python, JavaScript / Node.js, LaTeX

Tools Git / GitHub, React, CI/CD (GitHub Actions), Claude Code

CERTIFICATIONS

- AI For Everyone — DeepLearning.AI (Coursera)
- HEC DLSEI Cohort 3 — Coursera

TECHNICAL PROJECTS

O-Week Registration Token Board

LAN-based Node.js/Express + React app for live registration queue management; deployed campus-wide during O-Week 2026.

Aether Chess

UCI-compliant C++17 chess engine (handcrafted evaluator, negamax/PVS); validated with CTest, ASan/UBSan, and differential perf vs python-chess; CI on GitHub Actions (Linux + macOS).

Chess Engine Arena

Companion Node.js GUI for running UCI engines against each other with live evaluation.

LTspice Automation Tool (Agent Skill)

Python (stdlib-only) tool to read, edit, and simulate LTspice circuit files; open-sourced with an extensive validation corpus.

WhatsApp Auto-Reply Bot

Python automation using the Groq API for contextual auto-replies and urgent-message alerts.

C++ RPG macOS Port

Ported a Windows-only C++ game to macOS, replacing platform dependencies with POSIX equivalents.

COURSEWORK / CEP PROJECTS

Residential Electrical Circuit & UPS Design

Complete home wiring (6 rooms + garage/laundry) with UPS backup; MATLAB load/current/power cales and NI Multisim simulation; sized to 21.5 kW main and 1.6 kW UPS.

Inventory Management System

C++ console app for product and sales tracking (add/update/search, record sales, total value) using structs and modular design.

DC Power Supply Design

Regulated ~2.70 V circuit (full-wave rectifier, 4× 1N4007 shunt regulator); analyzed line/load regulation and ripple with oscilloscope verification; LaTeX report.
